Autumn Term 2017

Lunchtime Seminars are a seminar series held on Tuesday lunchtimes during term time from 13:00 to 13:50 in the Sutcliffe Lecture Theatre (Meteorology Building, GU01). All are welcome.

3 Oct  Claire Ryder
Coarse and giant mineral dust particles: do they exist and why should we care?

10 Oct  Flavia Pinheiro
Synchronisation: how can this help weather forecasts in the future?

17 Oct  Anthony Illingworth
Keynote seminar: WIVERN - A proposed satellite to observe global in-cloud winds and precipitation

24 Oct  Eunice Lo
Detection of sulphate aerosol geoengineering

31 Oct  Paulo Ceppi
Implications of evolving SST patterns for atmospheric circulation and climate sensitivity

7 Nov   Christoph Kent
Towards the improved representation of surface roughness in cities and implications for modelling the vertical profile of wind speed

14 Nov  Robin Hogan
Keynote seminar: Beyond two streams: representing the complex interaction of radiation with clouds, vegetation and urban areas

21 Nov  Jan Kamieniecki
Thermodynamic analysis of coupled-column models

28 Nov  Joshua Wells (Dept of Politics and International Relations)
Invited PhD speaker: Principles of governance to engage with the moral hazards posed by stratospheric geoengineering

5 Dec   Caroline Dunning
Changes in African Wet Seasons

For additional information contact: Ross Herbert (r.j.herbert@reading.ac.uk).

Tuesdays at 13:00
